Il. C., which coincides fairly with onlisury Hiblical chronology. The foundations or vaults, below the actual tame of the building which is pinced at Cresphon, about sixty miles from Habylon, have been measured and shown to e missurt 600 feet wide.

Upon this foundation a building about 799 feet high was placed, and from this rome the tower, composed of seven stages or floors, culminating in a remple or sanctuary about sixty feet in

### THE YOUNG MAN'S VOTE.

There are about 2,000 men in New Steries this fall who will cast their bal not for the first time, or, at feast, will be entitled to coust their bullet at the Covember election, says the Santa Fe New Mexican. Will these young men party of repullation, the party of abandoned ideas and theories, the party that seeks to destrocy instead of to bend up! It is propostoroom to believe that a young man in New Mexico, who will remain in this country and who intends to make his living in New Mexico, or neighboring states will vote for a party of the nation, that has never done as yet anything for New Mexico except to plunder ft. The young man who will give thought to the pelcelules and the history of the two parties will certainly vote the republican ticket this fall unless he desires to see himself go back ward with the country. The republican party stands for everything that the patriotic young man stands for, and why should be not give it his vote?

### BABEL'S TOWER.

A few years ago the timetallists were scarcity of gold and its continually declining quantity. It was argued that the gold standard was an inverted pyramic with the great mass of bustness de pending upon an extremely small basis. To-day the amount of gold in the posgeomion of the government breaks the record of all past history, the enormous sum being \$431,170,764 on August 1.

only these countries but from Johannes-

turg, which is now unhampered by South African aquabbles. The Pueblo Chieftain says that under triese circumstances it is difficult to see how anybody who recognizes the former conditions is to be repreached when be recognizes the present completely altered situation. It is not the citizen, about, and all that the citizen can do is to concede as much.

# COSTLY WAR.

The war which was to have clow with a dinner at Precoria last Christmas, and for which the British plum probling was setuall, mapped to South campaign to England is piling up at a fearful rate. From the imperfect reports of the statements made in the Reftish purliament during the discusslop over a supplemental war toan of £ 5.500,000 the spokesmuch for the government represented that the total cow of the war against the two South Af rican republics would probably amount to £60,000,000. But Sir William Vernon Harcourt: one of the liberal teaders it the house, boldly declared that he esbe nearer £30,000,000 than £60,000,000. It is even probable that the British pecple will never fully realize the total or st of the war, for the government is sur to conceal it as much as possible from public scruting for political reusons. The sum of \$400,000,000 is, however, a tremendous price to pay for the subjugotion of less than half a million of a farming population.
